

Voucher of €5.000 for

# Health Technology Assessment

01

## Goal 1: insight

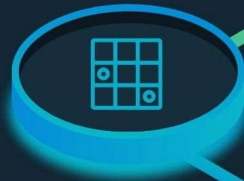

Gain insight in the potential health and economic effects of your innovation.

02

## Goal 2: course of action

Determine the most appropriate course of action for future health economic analyses based on the available evidence and data.

03

## Goal 3: placing

Explore the most appropriate place of the innovation in the healthcare system.

€2.500

## First assesment

first assesment of the innovation in which we analyze the product, the healthcare context and the already collected data

€7.500

## Qualitative approach

Based on expert interviews we will determine where in the healthcare process the expected room for improvement in terms of clinical or economic outcomes can be expected.

€7.500

## Quantitative approach

Based on the available data we will quantify the expected room for improvement in the healthcare processes in terms of health economic outcomes.
